# Perfection in Ripening Room Doors

BG Door International is the world's leading supplier of sectional ripening room doors for a wide range of fruits, including tropical fruits and especially bananas.

Because quality equipment is a precondition for optimum results in fruit cooling and ripening, perfectly insulated fruit ripening rooms ensure satisfactory performance.

BG Door has developed a superior range of gas-tight doors using high-grade materials and seals. Our quality doors provide the guarantee for profitable cooling and ripening.

#### Doors of Singular Quality

BG Door specializes in the manufacture of gas-tight Sectional Doors and Flex Doors for banana ripening rooms.

#### Sectional Doors

Our Sectional Doors are available in various panel thicknesses with environmentally friendly Polyurethane foam filling.

The special produced sections are equipped with thermal bridge interruptions with integrated special sealing at the joint sections.

The whole door is given a firm gas-tight seal through a triple gasket around the door perimeter.

#### Flex Doors

Flex Doors are especially developed for ripening rooms and fruit storage facilities where limited space is available or when an even higher grade of gas-tightness is required. The pre-fabricated Flex Door rolls on a PVC cylinder with fabric wrapped around it. This fabric runs between the vertical tracks guides by the use of an electrical operated motor. At full closed position, air cylinders will be activated causing the door to close gas-tight on the gaskets around the door perimeter.

All BG Doors are available in a range of standard colours or in any special colour to your requirements.

#### Custom Design and Installation

A thorough assessment of the client's requirements enables BG Door to prepare an exclusive tailor-made design for your facility.

Manufacture commences after final approval and installation is conducted by our highly skilled engineers when required.

#### A Worldwide Guarantee

Our clients conserve energy because of the superior insulating value of BG Doors. Our quality standards in design and manufacture keep maintenance costs low. All this is backed up by an industry-leading product warranty and a worldwide technical support system.
