

LED sign LW 46

Supply: 24 VDC

Main features:

Specifications electronic

Operating temperature: -20 C...+55 °C

Wiring analogue: 2x0.75mm²

Supply: 24 VDC

Power consumption: 100 mA

Flash frequency: none

Volume: none

Specifications construction

Housing protection: IP 20

Material: Housing made of powder-coated sheet

Weight: 0.9 kg

Features

- Simplified understanding by combining text/pictogram
- Can be combined with an external alarm horn
- Long service life as a result of LED technology (approx. 1,000 hours of operation)
- Text available in various languages
- Robust construction
- Mounted directly on two eye bolts left and right or with chains on the ceiling
- Housing made of powder-coated sheet steel, grey RAL 7001
- Suitable only for indoor installation
- Options: Text and colours can be modified at the customer's request
- Temperature range: -20...+55 °C
