Hand infeed temperature probe with PTFE-hand grip and silicone-cable

Measuring size: temperature

Output: passive sensor

Highlights: PTFE hand grip, water-vapour-proof casted, bend protection: stainless steel

### Description

The HE/E cable infeed temperature probe with PTFE-hand grip measures the temperature in the range of -50 up to +200°C in visco-plastical medium. The stainless steel infeed sleeve is with the connection cable fixed as well as water-vapour-proof casted. As foodstuffs probe it features different applications like e.g. measuring of unfrozen food, or as air probe for the temperature check of freezer and coolers.
